

# Viking Malt Energy Policy

**Viking Malt is a world wide acknowledged malting company that manufactures and sells cereal products and services of high and consistent quality to beverage, food and feed industry.**

As an active developer of innovative products and solutions we target to be the first choice of our customers when sourcing raw materials and ingredients. Energy efficiency is the key factor in reducing our carbon footprint, saving natural resources and ensuring the competitiveness of our company.

Viking Malt will not only comply with applicable legal requirements as well as other energy related obligations, but we will commit ourselves to continual improvement of our energy performance. We will ensure that the required information and necessary resources are available to achieve our objectives and targets.

We use renewable energy when possible considering our business environment. In energy supply our company operates on long-term basis, saving energy and with high operational reliability.

We ensure that the energy we use is produced and utilised based on best available practices. Energy efficiency is a guiding principle in the planning of our plant design, investments, production, logistics and sourcing of energy product and services.

We take care, that all our employees, sub-contractors and other stakeholders are aware of our goals and practises.
